

Hi, I am Rajesh. I am a self-starter and work on my own . I have had the opportunity to do some international work in diverse roles which has given me an understanding of both global and local market dynamics. I believe that all of us are unique and that there is no one size fits all model for success or happiness. For me, it's important to remain true to oneself instead of following the herd blindly. I have a MS in Chemical Engineering from Arizona State University and a MBA from University of New South Wales in Sydney, Australia. Currently back at ASU as a PhD student in Biomedical Engineering with research focused on microfluidics, bioprinting and cell/tissue engineering. I have done some work in the medical technology sector in Sydney Australia which has given me a good understanding of technology commercialisation. I am also an ex-sportsperson with state level medals to back it up. During my 25 years I have worked for companies both big and small . I have had the opportunity to work with Statoil, Amrita Biotech, Wipro Technologies , Xerox, Oracle, Buildium , CRISIL , Godrej , Nestle, FPL Group America , Firetide Inc., Ariadne Labs, Star India to name a few. And in my various roles I worked in various elimes, and in medical and biotech companies and in mobile gaming and gaming mobile applications. I have a good understanding of the Indian business culture and the Indian landscape. I am also aware of global trends so I can see what is coming down the road for India in the upcoming years. Having worked with many small to medium enterprises , I can assure that no one size fits all model for success. There are many who could do well by following a path that suits them, but be sure you will get lost if you follow someone else's path blindly. I have written many articles on many topics and I have also given talks on Innovation and Entrepreneurship in India and Australia. I am a regular speaker at conferences and events in India and abroad. I believe there is no one size fits all model for success. I firmly believe that all of us are unique and that there is no one size fits all model for success or happiness. For me it's important to remain true to oneself instead of following the herd blindly. The innovation article was published in our popular magazine 'Entrepreneur'. My article on 'Write your own destiny' was published in NASSCOM publication. More details can be found here. The startup article was published in NASSCOM publication. My article on 'Pushing the envelope' was also published in our popular magazine 'Entrepreneur'. More details can be found here and here .
